Magic APE FLAC CD Burner

[Download]

APE to FLAC Converter is a fast and easy-to-use app that converts APE files to FLAC format so that you can convert any APE file to FLAC without the need for separate downloading and conversion tools. It is very stable and has an extensive help file to guide you through the conversion process. From its name you could assume that it's a converter and that it would allow you to convert any type of files. But that is far from the truth. It does support audio and

video files. In the following post, I have decided to focus on what APE to FLAC Converter will do for you. APE to FLAC Converter description APE files are a lossless audio format. This means that unlike MP3 or MP4 files which compress the sound, APE files store it the way it was originally recorded. It was designed for video recording and editing so it really is compact and space efficient. Not that it has any downside. Audio editors can use it to store and read data from APE files. However, APE to FLAC Converter helps you to convert APE files to FLAC format.

By default, it will convert your files to FLAC but you can change this to another format if you like. You can also choose between the lossless and the lossy versions. When it comes to quality, Lossless version doesn't compress the sound much at all. The lossy version brings the sound down slightly. You can look up some more details on this over at Wikipedia. When you convert APE to FLAC, it is done in a single step. This means that you don't have to download additional tools and sit through the conversion process. You can just save the file to any location

on your computer or even the cloud. Using APE to FLAC Converter is easy. You just need to launch the app, select which file you want to convert, enter the location where you want the file to be saved and start converting. It is that simple. You should also be aware that your conversion can take some time because it is done in a single step. While converting, it will show a progress bar that will tell you when the conversion has finished. It is good to note that the sound quality of the result won't be the same as the one of the original file. And it will sound

a lot better than MP3 files. It has an extensive help file so you can look up all the options and features

Magic APE FLAC CD Burner

Australian based company, Magic Software, is specialized in software development and distribution of audio tools.
