About This Game

Radiation Island is a survival adventure game where you craft your own destiny in a huge open world environment. As part of the Philadelphia Experiment you have become stranded in a parallel, alternate reality. Discover this new and mysterious world, with all its surprises. Use everything you find to survive it and solve its puzzle to get back to the real world.

Follow your own path in an environment of breathtaking beauty and gigantic scope. Explore huge forests inhabited by dangerous wolves, bears and mountain lions. Investigate abandoned villages and old military compounds where zombies guard vital tools, weapons and clues to the secrets of this world. You can even swim and dive, if you can avoid the hungry crocodiles.

Hunt wild animals, fish or gather fruits to overcome hunger. Mine for resources and craft weapons, tools and basic vehicles. Find hidden treasures, equipment and fire arms to prevail in a world full of perils: radiation, anomalies, harsh weather and enraged zombies.

Experience the full day-night cycle and face the dangers of darkness and cold.

Excellent spy game. To make long story short:

It's a great game-simple, strategic, immersive (best ingredients for tasty cakegame base)

But it lacks players-the multiplayer is empty

So the cake is raw, you can only lick the spoon-won't last long

shame indeed. Awesome game for lovers of WW2, FPS and strategy games. Perfect for low-end computers and very, very affordable!!!!

I highly recommend this series. from the 1st game to the last this series does not disappoint.. Bought this game expecting a couple of hours of a little entertainment. Instead it kept me busy in my evenings for a week. It's a lot of fun and a good mouse-only time killer. The concept is really good and I hope the developers evolve it further in the hird release, adding more depth and progression.. Even though this and RTH30 were made around the same time, I feel that, whereas RTH30 has a lot of good ideas but a flawed execution, EiB tightens almost all the faults of its predecessor and hits the mark its aiming for a lot more frequently.

The gameplay itself is more-or-less identical to RTH30, but narratively it does something bold and actively undermines the perspective and heroics of the main character of the first game. In RTH30 you played troubled and occasionally whiney Matt Baker, and in EiB, his friend and occasional squadmate Red Hartsock. We see that Red's perspective of events differs quite strongly from Matt's, and that the character you played before wasn't viewed as quite the hero as the game made you feel. He is seen to be losing his mind and as such Red begins to distrust and even resent him. The dialogue feels a lot less clunky this time round, and the story hits the emotional peaks in a much stronger way. The sound effects are still fantastic and really immerse you in the battlefield, and the voiceover work is of better quality this time round, although there are small but noticeable moments of lacking audio that lower your immersion and occasionally undermine the emotion of the moment.

I felt like the level design of this game is superior to the first, and as such, I rarely felt like I was being funnelled into a kill-corridor in which you were damned no matter which path you chose. Searching for flanking routes and thinking outside the box is almost always rewarded, and allows you to feel like you're genuinely outwitting the enemy.

There is the odd AI brainfart, which is at best funny when you shoot an enemy and he stand there like nothing happened, and at worst rage inducing as your teammates move to the outside of cover rather than finding a proper place to hide, but generally speaking the enemy AI is quite strong, and they'll shift and change cover in order to confront a flanking threat.

Tonally the game is as dark as the first, and in its efforts to mimic the real feel of battle, the game is a sombre one. I feel rather harrowed now that it's done, and it makes a small but powerful effort to compliment the player's decision making when you keep your teammates alive. I think this is one of the best and most realistic-feeling WW2 games ever made, whilst also managing that fine balance that allows things to remain fun to play. I highly recommend this game, but you WILL need to have played the first one, in order to understand the story.. Very short game I actually had to idle a bit to get last card after I finished it

Hand drawn aeshtetic is really nice and clean defined mechanics work but unless you get it somewhere in bundle or at least 75% off its not worth the current price (10 euros). It was a lot of fun. Good TD game. Tradional red, green, and blue towers. But they brand out to so many different combinations. The usual summoner spells. A very well thought out talent tree. Not too hard, but not too easy, except for the last few levels, there's just a massive difficulty curve. I wanted to get 100% achievements on this, but just too frustrating for me for those final levels.. 1505 достижениями, недорогоя.

К тому же достижения тут одни из самых красивых, мемы, цифры, буквы....

Берите если хотите нафармить идеальные игры или достижения.. I used gothic steam fix to get it to work it was easy. This game is amazing but frustrating at first to get the hang of the combat controls. Once you do they work. No games are this good anymore. 10/10 would recommend.

not expecting much at the start but its a petty good game. Great LEGO game, but not really worth it nowadays. Get it on sale, maybe.. Hmmm, there are a few things I'm not sure of (colours, do they matter? - No, that wasn't a racist pun :P - There are colours of "flags" along the path of the adventure) which may be of importance I suppose but TBH I don't really care...

Update:

Yes, colours matters, red=chance encounter (don't know if they're random or not but you won't know what it is beforehand), green= healer and so on.

It is really hard to explain what this game really is, as it's not really a game that fits a normal genre (it's at least not like anything I've ever played), I will stick to it having a "CCG feel" to it as you have four different choices at the start of a battle (and three ghosts to choose from) and you'll have to think about what counters the ghost you face best, what would be the best choice. (increase damage\defense\debuffing enemy and use your round without dealing damage or attack and take more damage from enemy's attack)

It will have you planning, have you thinking, have you learning what ghost you have - if any - that's best against that other ghost's powers and also when you're at a merchant you think about whether defense for survival or attack for faster kills and so on is best.

My initial review was after me having played a game a lot deeper than it'd appear at first glance for about an hour, now after thinking about that round and having the basics down I played another 2 hours or so and loved every minute of it, conclusion: I do not in any way shape or form regret having spent money on this game, love it.. Routes are ok but in some places incomplete - signaling. Please,, if U making route finishe it ! And don't forget screw up with timing - clearly it is impossible to keep to the schedule.

At first it was thumb up but after playing it for a little while it is going to be down, sorry.. Product key is not working. And active button still won't working
